

FU-77TZ

Fiber Unit Thrubeam type

\*Please note that accessories depicted in the image are for illustrative purposes only and may not be included with the product.

Specifications

|                                                           |                     |                             |
|-----------------------------------------------------------|---------------------|-----------------------------|
| Model                                                     |                     | FU-77TZ*1                   |
| Optical axis diameter<br>(Standard target to be detected) |                     | ø1.13 mm 0.04"              |
| Size                                                      |                     | M4                          |
| Fibre unit length                                         |                     | 2 m 6.56', Free-cut         |
| Fibre unit diameter                                       |                     | ø2.2 ø0.09"                 |
| Shape                                                     |                     | Hex-shaped                  |
| Minimum bend radius                                       |                     | R2 mm R0.08", ToughFlex     |
| Environmental resistance                                  | Ambient temperature | -40 to +50 °C -40 to 122 °F |
| Weight                                                    |                     | Approx. 25 g                |

\*1 For details on the detecting distance, see the fiber amplifier catalog.
