The first page of this cross reference provides valve face-to-face dimensions for comparison.

With some replacements, it may be necessary to modernize the wiring to line voltage (120V/60 Hz). When rewiring to line voltage, make sure that the limit controls (if used) and associated controls are compatible with 120V/60 Hz.

FOOTNOTES:
 ① 13-inch diaphragm.
 ② 8-1/4 for V517/V518, 10-1/4 for V519.
 ③ 6-inch valve was also manufactured.
 ④ Single V5097 body with 2 pipe adapters installed.

FOOTNOTES:

① VA44/V84 are solenoid operated gas valves.

② Pilot tapping is 1/4 in. NPT.

③ Capacity indicated is for 1 in. w.c. pressure drop (0.64 specific gravity gas) across the valve.

④ Replacement is 60 Hz.

FOOTNOTES:

- ① On 208V or 240V applications, one of the following three alternatives are recommended:
 - a. Modernize system to 120 volt. Replacement V48A,J models do not have position indicator.
 - b. Use the V4055/V5055 as shown.
 - c. Use a V88 of the same size and a 208 volt or 240 volt to 24 volt (AT20 or AT72) transformer.
- ② Valve position indicator.
- ③ 1/2 inch valve is not available; use a 3/4 inch replacement valve and appropriate coupling adapter.
- ④ V48 replacement valve does not include orifice.
- ⑤ Rated for minus 40° F.
- ⑥ Replacement does not have manual opener feature.
- ⑦ Contact Midco International, 4140 West Victoria Street, Chicago, IL 60646 for replacement and service instructions.
- ⑧ Capacity indicated is for 1 in. w.c. pressure drop (0.64 special gravity gas) across the valve.
- ⑨ Replacement is 60 Hz unless indicated otherwise.
- ⑩ Replacement does not have position indicator.

- ① On 208V or 240V applications one of the following three alternatives is recommended:
- Modernize system to 120 volt. Replacement V48A,J models do not have position indicator.
 - Use the V4055/V5097 as shown.
 - Use a V88 of the same size and 208V or 240V to 24V (AT20 or AT72) transformer.

② Valve position indicator.

③ 1/2 inch valve is not available; use a 3/4 in replacement valve and appropriate coupling adapter.

④ V48 replacement valve does not include orifice.

⑤ Rated for minus 40°F (minus 40°C).

⑥ Replacement does not have manual opener feature.

⑦ Contact Midco International, 4140 West Victoria Street, Chicago, IL 60646 for replacement and service instructions.

⑧ Capacity indicated is for 1 in. w.c. pressure drop (0.64 specific gravity gas) across the valve.

⑨ Replacement is 60 Hz unless otherwise indicated.

⑩ Replacement does not have position indicator.

FOOTNOTES:

- ① VA435 is a solenoid gas valve.
- ② Valve capacities with 1.0 in. w.c. pressure drop (0.64 specific gravity gas) across the valve.
- ③ 1/8 NPT pilot tapping.

V493/V893.

Device to be Replaced	Current Replacement		Device Description																																
	Actuator	Valve																																	
V493	V4055A	V5055B	V493 and V893 are large diaphragm valves; some models have damper arms. V493 has line voltage operator; V893 has low voltage operator. Choose the V4055A fast-opening actuator with the appropriate voltage and V5055B valve of the same size for replacement. Modernize system to 120V/60 Hz when replacing V893.

V495X1164	None	3/8	74	220/50	3.5	International model. With manual opener.
V495X1172	None	3/8	74	208/50	3.5	International model.

FOOTNOTES:

- ^① Perform pilot turndown test if V495 is used for pilot application.
- ^② Replacement does not have manual opener.
- ^③ Replacement does not have minimum flow adjustment.
- ^④ V495 is low capacity solenoid gas valve.
- ^⑤ Capacity indicated is for 1 in. w.c. pressure drop (0.64 specific gravity gas) across the valve.
- ^⑥ With minimum flow adjustment.

V499/V899.

Device to be Replaced	Current Replacement	Device Description
V499	V48	V499 and V899 are diaphragm gas valves in sizes 3/4 inch to 2 inches. V499 is line voltage and V899 is low voltage. Choose appropriate V48 or V88 using information in this section on V48 and V88.
V899	V88	

V517/V518/V519.

Device to be Replaced	Current Replacement		Device Description
	Actuators	Valves	
V517 & V166 ①	V4055A ↓	V5055B ↓	V517, V518, V519 are diaphragm valves used with the V166, V466, V866 operators. Some models have damper arms. Choose the V4055A fast-opening actuator with proper voltage and V5055B valve of proper size. Specifications:

V4001D1055	None ①	1/4	68	208/60	10.0	

FOOTNOTES:

- ① Recommend modernizing to 120V/60 Hz and using V4046C1005 or V4046C1021.
- ② Capacity indicated is for 1 in. w.c. pressure drop (0.64 specific gravity gas) across the valve.

V4004/V8004 DIAPHRAGM GAS VALVES.

The V4004/V8004 family of valves provide both on-off and on-off plus modulating type of gas control. The table below lists brief specifications by model type. The V4004A-D and V8004A-D opens when energized. The V4004E-H and V8004E-H have an integral on-off low fire switch and modulating controller. The modulating controller is operated by either temperature or pressure.

Model	On-Off	Integral On-Off Low Fire Controller		Modulating Controller Operated By:		Damper Arm
		Line Voltage	Line Voltage	Pressure	Temperature	
V4004A	X					Yes
V4004B	X					No
V4004C	X					Yes
V4004D	X					No
V4004E		X		X		Yes
V4004F		X		X		No
V4004G		X			X	Yes
V4004H		X			X	No
V8004A	X					Yes
V8004B	X					No
V8004C	X					Yes
V8004D	X					No
V8004E			X	X		Yes
V8004F			X	X		No
V8004G			X		X	Yes
V8004H			X		X	No

In addition, the V4004C,D and V8004C,D have provisions for manual opener. These devices also have predatamatic OS number identities and are, therefore, not listed in this cross reference.

To replace the V4044/V8004 with the V4055/V9055/V5055 or V5097 family of valves and actuators may require some rewiring and the addition of a modulating temperature or pressure controller such as the P455A or T991E. Suggested wiring methods are shown on the next page.

V4004 CONVERSION AS SHOWN.
LOW VOLTAGE V8004 CONVERSION IS SIMILAR EXCEPT LOW VOLTAGE TRANSFORMER SHOULD B E TAKEN OUT OF THE CIRCUIT.

REPLACING V4004A-D,
V8004A-D WITH V4055A

REPLACING V4004E-H, V8004E-H WITH V9055A

WIRING METHOD 1

WIRING METHOD 2

FOOTNOTES:

- ① Recommend modernizing to 120V/60 Hz and selecting proper V9055A Actuator, V5055B Valve and P455A or T991E Controller.
- ② Capacity indicated is for 1 in. w.c. pressure drop (0.64 specific gravity gas) across the valve.
- ③ Replacement has flanged connections.
- ④ 6-inch valve not available.
- ⑤ Recommend modernizing to 120V/60 Hz and selecting proper V4055A Actuator and V5055A Valve.

- FOOTNOTES:
- ① Recommend modernizing to 120V/60 Hz and selecting proper V9055A Actuator, V5097B Valve and P455A or T991E Controller.
 - ② Capacity indicated is for 1 in. w.c. pressure drop (0.64 specific gravity gas) across the valve.
 - ③ Replacement has flanged connections.
 - ④ 6- inch valve not available.
 - ⑤ Recommend modernizing to 120V/60 Hz and selecting proper V4055A Actuator and V5097A Valve

FOOTNOTES:

① Order 133534A Adapter for mounting V4055Q on V5034A valve with long stem.

② Order 133533A Adapter for mounting V4055A on V5034A valve with short stem.

③ Since a direct-acting or reverse-acting damper arm assembly was available as an accessory, the OS number cross-reference may not be correct for the damper arm. If damper arm is required, refer to V4055 Replacement section.

④ Replacement has “FM proof-of-closure”/“UL valve seal over travel interlock” switch.

⑤ Ambient temperature rating of 32° F to 125° F.

⑥ Replacement has ambient temperature rating of -40° F to 150° F.

⑦ Refer to V5034 listing in this section to identify if valve is long or short stemmed.

⑧ Replacement has damper arm.

V4055F1006	V4055F1006	120/60	↓	No	5	Manual operation. Proof-of-closure switch.	
V4055G1004	V4055G1004	120/60		No	No	5	Manual operation.

FOOTNOTES:

^① Opening time tor 60 cycle and 50 cycle is listed below:

Frequency	60 Cycle	50 Cycle
Fast	13 sec	16 sec
Standard	26 sec	32 sec

^② Maximum operating pressure is 25 psi when the V4055 is used with 3/4, 1-1/4, 1-1/2 inch valves; 15 psi when used with 2, 2-1/2, 3 inch valves.

^③ Plus a DIN approved V5055A with BSP PL threads;

^④ Replacement has auxiliary switch and damper shaft.

^⑤ Replacement has auxiliary switch and NEMA 4 enclosure.

^⑥ Replacement has damper shaft.

^⑦ Replacement is 240V/60 Hz.

^⑧ Replacement is 120V/60 Hz.

^⑨ 220V/50 Hz replacement is V4055A1247.

^⑩ Ambient temperature rating is -23° C to 69° C.

^⑪ Actuators must be used with DIN approved valve body. See V5055 valve cross reference in this section.

^⑫ Can be used with 50 Hz but opening time will increase by 20%.

FOOTNOTES:

Can be used with 50 cycle. Opening time will increase by 20%.

- ① Opening time for 60 cycle and 50 cycle is listed below:

Frequency	60 Cycle	50 Cycle
Fast	13 sec	16 sec
Standard	26 sec	32 sec

- ② Recommend modernizing system to 120V/60 Hz and selecting proper V4062 Actuator.
- ③ Plus a DIN approved V5055B valve body.
- ④ Auxiliary switch calibrated to operate at approximately 90 percent of stem travel.
- ⑤ Low fire switch adjusted to minimum setting.
- ⑥ Actuators must be used with DIN approved valve body (V5055).
- ⑦ For most effective low fire control, recommend the V4062A,D Actuators be used with the V5055B Gas Valve.

FOOTNOTES:

- ① Replacement has two 30 inch wires.
- ② Replacement has three 30 inch wires.
- ③ Regulator set points for replacement valves are field adjustable.
- ④ Regulator set points are factory set at 3.5.
- ⑤ Regulator set points are factory set at 10.0.
- ⑥ Regulator set points are factory set at 0.8 & 3.5.
- ⑦ Regulator set points are factory set at 1.4 and 10.0.
- ⑧ On-off with pilot take-off.
- ⑨ OEM special model.
- ⑩ Functional replacement is 24V.
- ⑪ Includes ambroid on adjustment screw.

FOOTNOTES:

- ① If the V5034 Valve still has the V4034 Actuator, replace the V4034 Actuator with the appropriate V4055A Actuator.
- ② Replace the V6034 or V9034 Actuator with the appropriate V4062 or V9055 Actuator.
- ③ Capacity indicated is for 1 in. w.c. pressure drop (0.64 specific gravity gas) across the valve.

FOOTNOTES:

- ① Capacity indicated is for 1.0 in. w.c. pressure drop (0.64 specific gravity gas) across the valve.
- ② The pressure indicated in this column is the maximum operating pressure of the V5055 when used with the high pressure on-off actuator V4055B or E. Refer to the following table for complete listing of maximum operating pressure under all possible valve-actuator combinations.

- ③ With 1/4-NPT upstream tap and plug.
- ④ With 1/4-NPT downstream tap and plug.
- ⑤ With BSP upstream tap and plug.
- ⑥ With additional 1/8 inch downstream tap and plug.
- ⑦ With additional 1/4 inch downstream tap and plug.
- ⑧ For most effective modulating characteristics, the V5055B Gas Valve should be used with the V4062A,D and V9055A,D Valve Actuators.

Psi diff.: This is the maximum differential pressure in psi at which the valve actuator can operate. It can also be called maximum operating pressure.

Psi close-off: This is the maximum differential pressure that the valve can withstand with leakages within specification. (Some approval bodies require the close-off pressure of the valve to be rated at the upstream pressure of the pressure regulator.)

FOOTNOTES:

- ① Capacity indicated is for 1.0 in. w.c. pressure drop (0.64 specific gravity gas) across the valve.
- ② The pressure indicated in this column is the maximum operating pressure of the V5097 when used with the high pressure on-off actuator V4055B or E. Refer to the following table for complete listing of maximum operating pressure under all possible valve-actuator combinations.
- ③ With three 1/4 in. NPT upstream tap and plug.
- ④ With two 1/4 in. NPT downstream tap and plug.
- ⑤ With three BSP upstream tap and plug.
- ⑥ For most effective modulating characteristics, the V5097B Gas Valve should be used with the V4062A,D and V9055A,D Valve Actuators.

Valve	Actuator		
	V4055A,D	V4055B,E	V4062A,D V9055A,D
V5097A,C 3/4 in. to 3 in.	5 psi Diff. 15 psi close-off.	15 psi diff. 15 psi close-off.	5 psi diff. 15 psi close-off.
V5097B 3/4 in. to 3 in.	5 psi Diff. 15 psi close-off.	15 psi diff. 15 psi close-off.	5 psi diff. 15 psi close-off.
V5097D,E 3/4, 1, 1-1/4, 1-1/2 in.	5 psi diff. 75 psi closeoff.	25 psi diff. 75 psi close-off.	—
V5097D,E 2, 2-1/2, 3 in.	5 psi diff. 45 psi close-off.	15 psi diff. 45 psi close-off.	—

- Psi diff. This is the maximum differential pressure in psi at which the valve actuator can operate. It can also be called maximum operating pressure.
- Psi close-off. This is the maximum differential pressure that the valve can withstand with leakages within specification. (Some approval bodies require the close-off pressure of the valve to be rated at the upstream pressure of the pressure regulator.)

HO4A252A01	None	120/50,60	on-off	5.0	15	no	^④
HO4A254	V4055A1114 ^⑩ ^⑫	240/50,60	on-off	5.0	15	no	^④

FOOTNOTES:

- ^① Must be used with Q5055 Adapter. See Accessory section.
- ^② Recommend modernizing system to 120V, 60 Hz.
- ^③ Actuator that has proof-of-valve closure switch to meet insurance or Underwriters Laboratories Inc. requirements should be modernized to 120V, 60 Hz. (120V, 60 Hz is an Underwriters Laboratories Inc. requirement and is recommended by Insurance companies.)
- ^④ In some cases, the device to be replaced may have additional options such as auxiliary switch(es), damper shaft return-spring, etc. Reference V4055/V4062/V9055 pages in this section for closest replacement. Hydramotor actuator options are designated by a suffix number following the catalog number. Actuator options are as follows:

Suffix to Catalog Number

- 01 = With spring-return damper arm—with one auxiliary switch that may be adjusted to actuate at any position of the stroke.
- 03 = With spring-return damper arm.
- 04 = Two auxiliary switches—may be adjusted to actuate at any position of the stroke (available only with nonproof-of-closure actuators).
- 10 = Less damper arm.
- 11 = Less damper arm—with one auxiliary switch that may be adjusted to actuate at any position of the stroke.
- 12 = Less damper arm—with two auxiliary switches that may be adjusted to actuate at any position of the stroke. (Available only with nonproof-of-closure actuators.)
- 14 = Less damper arm—with one 0-135 ohm auxiliary potentiometer.
- 15 = Less damper arm—with one auxiliary switch and one auxiliary potentiometer (0-135).
- 21 = One auxiliary switch—may be adjusted to actuate at any position of the stroke.
- 22 = One 0-135 ohm auxiliary potentiometer.
- 24 = One auxiliary switch and one auxiliary potentiometer (combination of options 21 and 22) (available only on nonproof-of-closure actuators).
- 25 = Less damper arm—with one auxiliary switch that may be adjusted to actuate at any position of the stroke; switch mounted on *right* side of actuator. (Not available on proof-of-closure actuators.)
- 26 = One auxiliary switch—may be adjusted to actuate at any position of the stroke. Switch mounted on right side of actuator. (Not available on proof-of-closure actuators.)
- 27 = With spring-return damper arm. Two auxiliary switches—may be adjusted to actuate at any position of the stroke. (Not available on proof-of-closure actuators.)
- 30 = With special damper arm extension shaft (3 inches beyond face of actuator)—less damper arm lever.
- 31 = With special damper arm extension shaft (3 inches beyond face of actuator)—with return-spring.
- 33 = 3/8 inch square drive rod for customer's damper arm assembly—less damper arm.
- 34 = 3/8 inch square drive rod for customer's damper arm assembly—less damper arm. AH2A1025 only with opening time of 20 seconds plus 0, minus 5 seconds.

FOOTNOTES:

- ① In some cases, the device to be replaced may have additional options such as auxiliary switch(es), damper shaft, weatherproof enclosure, etc. Reference V4055/V5097 Cross Reference in this section for closest replacement.
- ② Replacement opening time is 13 seconds.
- ③ Replacement opening time is 26 seconds.
- ④ Replacement combination maximum operating pressure differential is 25 psi.
- ⑤ Underwriters Laboratories Inc. requires and insurance companies recommend 120V/60 Hz with "proof-of-closure" function.
- ⑥ Capacities indicated are for 0.64 specific gravity gas with a one inch w.c. pressure drop across the valve.

FOOTNOTES:

① The ITT General Actuator must also be replaced with the appropriate Honeywell V4055 Fluid Power Actuator. Reference V4055 cross reference in this section.

② Valve capacity is based on gas with 0.64 specific gravity at one inch water column pressure drop.

③ In some cases, the device to be replaced may have additional options such as upstream and downstream plugged pressure taps. Reference V5055 cross reference in this section for closest replacement.

④ “V15” added to catalog number indicates valve has parabolic guide.

⑤ “V22” added to catalog number indicates standard guide with valve seal overtravel interlock.

⑥ Replacements have one 1/4 inch NPT downstream tap and one 1/4 inch NPT upstream tap.

⑦ Used with ITT General AH Series Gas Valve Actuators.

⑧ Use appropriate V4055B or E Gas Valve Actuator.

FOOTNOTES:

①

Used with ITT General AH Series Gas Valve Actuators.

②

The ITT General Actuator must also be replaced with the appropriate Honeywell V4055 Fluid Power Actuator. Reference V4055 cross reference this section.

③

Valve capacity is based on gas with 0.64 specific gravity at one inch water column pressure drop.

④

Replacements have one 1/4 inch NPT downstream tap and one 1/4 inch NPT upstream tap.

⑤

Use appropriate V4055B or E Gas Valve Actuator.

⑥

"V15" added to catalog number indicates valve has parabolic guide.

⑦

"V22" added to catalog number indicates standard guide with valve seal overtravel interlock.

⑧

In some cases, the device to be replaced may have additional options such as upstream and downstream plugged pressure taps. Reference V5097 cross reference this section for closest replacement.
