GENERAL

DESCRIPTION

A synchronous motor powers an output shaft and a cam shaft via a gear reducer.

The cam shaft operates limit and auxiliary switches. The

position at which one of the limit or auxiliary switches operates can be adjusted steplessly within the operating range using the associated cam disc. Spindle-driven cams, which can be adjusted with a screwdriver, are available.

FEATURES

Electric actuator up to 2.8 Nm

- **Drive times: 5 ... 30 sec.**
- **Variants:** - clockwise or counter clockwise rotation
- with integrated electronic circuitry
- shaft version
- **Output shaft, can be decoupled**
- **Particularly slim housing, output perpendicular to the housing**
- **Position indicator**
- **Easily adjustable limit and auxiliary switches**
- **Synchronous motor**

Technical Data

Housing

- impact-proof, heat-resistant synthetic material
Colour: black

Drive motor

- reversible synchronous motor

Clutch

- the gear can be separated from the engine by turning a 3mm Allen key 30°.

Switch point setting

- via stepless cam setting, spindle-driven cam with superimposed scale

Position indicator

- via co-rotation scale

Connection system

- fixed cable connection with 9-in plug, cable outlet either straight or from the side

Gearing

- spur gearing, maintenance-free

Drive shaft

- Standard plastic, interior square 8 mm, output shaft is perpendicular to the device

Fitting and fastening

- fastened with 2 M 5 screws

PCBs

- for all electrical functions, increased conductor thickness

Mains voltage

- 230 V -15% +10%

Mains frequency

- 50 Hz or 60 Hz

Safety class

- II VDE 0631

Power consumption

- approx. 9 VA

Duty cycle

- 50% in 2 minutes

Interference suppression

- N (according to VDE 0785)

Actuating angle

- max. 90°

Mounting position

- any

Protection

- IP 00, housing partly open via snap hook (DIN 40050)

Cable connection

- via 9 pin AMP socket connector

Direction of rotation

- see "Type overview"

Torque and holding torque

- see "Type overview"

Drive times

- 5, 10, 13, 15, 26, 30 sec for 90°

Limit and auxiliary switches

- max. 5 operation with adjustable cam discs, cams coloured in normal way:
 - blue fully closed position
 - orange low load
 - red high load
 - black spare switches for additional functions
- switching voltage AC 24...230 V
- switching capacity with inductive loads 250 VA

Ambient temperature

- operation 0 ... +60° C
- transport and storage -20 ... +60° C

Condensation, icing and exposure to water not permitted

Weight

- approx. 500 g

DIMENSIONAL DRAWING

D) Fixing hole through-hole 5,1 mm inside dia

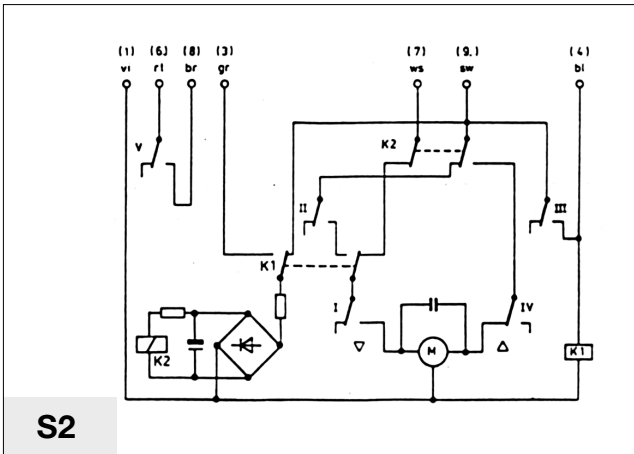

D1) Centering burrs 5,0 mm inside dia

INSTALLATION AND OPERATION

INSTALLATION AND FINAL CHECKOUT

- The regulations and standards applicable in each particular case must be observed.
- Installation and commissioning must only be carried out by qualified technicians.
- Electrical wiring must comply with national and local regulations.
- Always lay the burner ignition cable separately and as remotely as possible from the device and other cables.
- Carefully check all cabling and wiring prior to commissioning.
- Disconnect the actuators completely from the power supply when working close to terminals and connections.
- Screw the housing cover securely in place to provide shock-hazard protection on the actuator and all electrical connections.
- Electromagnetic emissions must be checked on a case by case basis.

INSTALLATION AND OPERATION

INSTALLATION AND FINAL CHECKOUT

- The regulations and standards applicable in each particular case must be observed.
- Installation and commissioning must only be carried out by qualified technicians.
- Electrical wiring must comply with national and local regulations.
- Always lay the burner ignition cable separately and as remotely as possible from the device and other cables.
- Carefully check all cabling and wiring prior to commissioning.
- Disconnect the actuators completely from the power supply when working close to terminals and connections.
- Screw the housing cover securely in place to provide shock-hazard protection on the actuator and all electrical connections.
- Electromagnetic emissions must be checked on a case by case basis.

ACTUATOR

LKS 118

FOR AIR DAMPERS ON OIL AND GAS BURNERS

PRODUCT HANDBOOK

APPLICATION

The LKS 118 air damper actuator is designed to be fitted to oil and gas burners for simple 2 position actuation.

GENERAL

DESCRIPTION

A synchronous motor powers a output shaft via gear reducer.

An optional micro-switch is available for position indication. The opening angle can be easily and steplessly adjusted via two limit switches.

FEATURES

Electric actuator up to 0.6 Nm

- **Drive time: 5 sec.**
- **for simple damper movements on small burners**
- **Variants:** - clockwise or counter clockwise rotation
 - with optional micro-switch
 - shaft version
- **Easily adjustable limit switches**
- **Synchronous motor**

at 60 Hz, Drive times are about 20 % shorter
- 5) under nominal conditions
under extreme conditions (e.g. +60 °C, 230V -15%) the torques will be 25% lower
- 6) +10% -15%; 50...60Hz
at -15%; torque reduced by approx. 20% at undervoltage

Technical Data

Housing

- impact-proof plastic
Colour: black

Drive motor

- reversible synchronous motor

Switch point setting

- via steplessly adjustable limit switch

Position indicator

- none

Connection system

- fixed 3 or 4 core cable connection, cable length approx.
50 cm

Gearing

- spur gearing, maintenance-free

Output shaft

- standard: Couples to 6 mm round shaft bevelled to 5 mm.
The output shaft position can easily be corrected by
turning a gear wheel by hand

Fitting and fastening

- Fixing from outside using 2 M4 screws

Mains voltage

- 230 V -15% +10%

Mains frequency

- 50 Hz or 60 Hz

Safety class

- II VDE 0631

Power consumption

- approx. 9 VA

Duty cycle

- 50% in 2 minutes

Interference suppression

- N (according to VDE 0785)

Actuating angle

- max. 130°

Mounting position

- any

Protection

- IP 00 (DIN 40050)

Cable connection

- fixed, 3 or 4 core

Direction of rotation

- see "Type overview"

Torque and holding torque

- see "Type overview"

Drive times

- 5 sec for 90°

Switch

- 2 limit switches
operation with adjustable stops
- switching voltage
AC 24...230 V
- switching capacity
with inductive loads 250 VA

Ambient temperature

- operation 0 ... +60° C
- transport and storage -20 ... +60° C

Condensation, icing and exposure to water not permitted**Weight**

- approx. 350 g

GENERAL

DESCRIPTION

A synchronous motor powers an output shaft and a backlash-free cam shaft via a gear reducer.

The cam shaft operates limit and auxiliary switches. The position at which one of the limit or auxiliary switches operates

can be adjusted steplessly within the operating range using the associated cam disc. Manually adjustable lever-operated cams or spindle-driven cams, which can be adjusted with a screwdriver, are available.

FEATURES

Electric actuator up to 15 Nm

- **Drive times: 3.5 ... 30 sec.**
- **Variants:** - clockwise or counter clockwise rotation
- with integrated electronic circuitry
- shaft version
- **Gearing can be decoupled**
- **Position indicator**
- **Easily adjustable limit and auxiliary switches**
- **Synchronous motor**
- **Particular stable design in aluminium housing**

Technical data

Housing

- robust aluminium housing with plastic cover

Drive motor

- reversible synchronous motor

Clutch

- red lever, separates gearing from motor

Switch point setting

- stepless cam setting, lever-operated or spindle-driven cams; if spindle-driven, with superimposed scale

Position indicator

- if desired the cover can contain a window and pointer, internally via a co-running pointer and scale

Connection system

- terminal blocks

Gearing

- spur gearing, maintenance-free

Drive shaft

- steel

Fitting and fastening

- front of gear acts as contact area. Fixing from outside via M5 or M6 screws, thread in housing

PCBs

- for all electrical functions, increased conductor thickness

Mains voltage

- 230 V -15% +10%

Mains frequency

- 50 Hz or 60 Hz

Safety class

- I VDE 0631

Power consumption

- 7...15 VA

Duty cycle

- Depending on motor, 50 to 70 % in 2 minutes

Interference suppression

- N (according to VDE 0785)

Actuating angle

- 90°, in exceptional cases also larger

Mounting position

- any

Protection

- IP54, with appropriate design of the cable entries, cover without window (DIN 40050)

Cable entries

- 2 x PG11

Cable connection

- terminal block for 0.5 mm² (min.) and 2.5 mm² (max.)

wire cross-section

Direction of rotation

- see "Type overview"

Torque and holding torque

- see "Type overview"

Drive times

- 3.5 ... 30 sec for 90°

Limit and auxiliary switches

- max. 7
operation with adjustable cam discs, cams coloured in normal way:
